

The Orko 24V Spike Light delivers versatile and reliable illumination for exterior architectural and landscape applications.

Designed to provide focused, high-quality light, the 40° beam angle creates a dramatic and refined lighting effect for planting, facades and architectural features.

Its durable IP67 construction and black finish ensure long-term performance in demanding outdoor conditions. The integrated 2m cable provides flexible installation options.

The external LED accent lighting solution designed for electricians, and that meets the needs of architects, designers and landscape gardeners.
