

The Orko 24V CCT adjustable Spike Light delivers versatile and reliable illumination for exterior architectural and landscape applications.

Unleash the full spectrum of white light with our tunable white - transition between warm and cool white light, creating the perfect ambiance for any setting.

Designed to provide focused, high-quality light, the 40° beam angle creates a dramatic and refined lighting effect for planting, facades and architectural features.

Its durable IP67 construction and black finish ensure long-term performance in demanding outdoor conditions.
